Nuovit
Homes

At Nuovit Homes we always work with our eye on the future, we are committed to sustainable construction and energy saving.

We create projects for them to become the new home you have always wanted.

Let us invite you to a new lifestyle, a home where you will be able to focus on your dreams and senses. Welcome to Octavia.

What design can imagine,
we make reality.

Welcome to exclusivity.

OCTAVIA is in West Málaga, an area in the new and exclusive golden mile of the city.

A building in which you can enjoy natural environment surrounded by green spaces and recreation areas. Perfect for walking, doing sport or enjoying beachside restaurants.

The development is in an exceptionally well-connected area, on Calle Pacífico, next to the Antonio Banderas promenade, with the possibility of accessing any part of the city in just a few minutes.

“The city of Malaga has been able to regenerate, grow and modernize itself, becoming a cultural reference in southern Europe”.

The New York Times

Vibrant Málaga.

With sea views and a strategic location, OCTAVIA is one of the most exclusive residential development in the city.

In a unique place, in a cosmopolitan city with its own personality, home to culture and museums, Málaga is the great star of southern Europe.

This city founded by the Phoenicians has an impressive historical legacy. During its Muslim period, the then-called “Málaga” built its Alcazaba fortress. Other tourist attractions are the Roman Theatre and its Cathedral, the construction of which began during the reign of the Catholic Monarchs.

It has become the cultural city of museums, with an enviable cultural agenda. Film, dance, music or theatre festivals are complemented by art exhibitions in its more than 40 museums spread throughout the capital. Its gastronomic offer is also outstanding, with more and more national and international haute cuisine restaurants.

In short, living in Málaga has become a privilege and a true, purely Mediterranean lifestyle.

40 museums:

An unbeatable environment.

OCTAVIA is in the heart of Málaga, in an exceptionally well-connected area. **It has close access to the AP-7 motorway, the María Zambrano AVE (high speed) train station and the international Pablo Ruíz Picasso airport, just 10 minutes by car.**

The area has all the necessary services for a full and comfortable life. Surrounded by parks and landscaped areas, it is just a few metres from sports facilities, such as the **Municipal Athletics Stadium, and the Inacua sports centre**. It is an expanding area with **day care center, schools and universities, as well as health centres, hospitals and shops**.

The city is increasingly positioning itself as a **technological hub** in Spain and Europe. It has a wide variety of technological businesses (Google, Amazon, Vodafone, etc.) and **start-ups**, as well as a series of programmes and events that promote innovation and entrepreneurship.

Connected to the world.

Málaga has **direct flights to 130 cities worldwide**. There are direct regular flights to the main European cities (Paris, Munich, London, Lisbon, etc.) as well as to non-European ones (New York, Montreal, Doha and Abu Dhabi, among others).

A total of 52 airlines will connect the Costa del Sol with the world through 254 routes, of which two hundred will be flights to European countries and 33 to other Spanish airports.

It also has an excellent railway connection. **Numerous high speed (AVE) and medium-haul trains depart from the María Zambrano railway station**, in the city centre, every day, connecting Málaga to other Spanish cities such as Madrid, Barcelona, Seville, Valencia, Alicante and Granada.

Málaga is one of the most important ports in Spain with regard to cruise ships. It receives 280 cruises every year with a total of 650,000 passengers approximately.

The city also has an extensive cycle lane network that is constantly expanding. It currently has more than 180 kilometres of cycle lanes that cover a large part of the city.

Architectural uniqueness.

Its unique and exclusive architecture and advanced residential concept on which it is based, make OCTAVIA one of the most relevant real estate projects of the next few years and with the greatest impact on the city. Its great functional and aesthetic attractiveness completely fits in with the surroundings and achieves a harmonious complex on the seafront. The distribution of the rooms and the light make it a very special place.

It stands out for the uniqueness of its architectural lines and the combination of the terraces that vibrate and turn, bringing energy to the building.

Efficient and innovative.

The contemporary-style design focuses in outdoor areas, functionality and space optimization. All properties are connected with a large terrace with a view to the Mediterranean sea. This is where indoors and outdoors spaces merge, creating a Mediterranean vantage point over the Málaga Bay.

The roof of the building is the main meeting place where the pool and sundeck become the focal point, creating a single community.

The innovative design of Octavia is based on:

- Integration with the natural environment.
- Latest technology applied to habitability.
- Flexibility of spaces and amenities.
- Sustainable design.
- Attractive aesthetic.

A project that reads the environment and makes the most of what a Mediterranean city means, captures its light, its breeze and the calm of the sea.

Proposed infographic of reference

An exceptional project.

This project comprises a **12-storey tower, housing 44 properties with 1, 2, 3 or 4 bedrooms** and two garage spaces (except the 1 bedroom properties that will have one) and a storage room. Large terraces and open areas to enjoy the Málaga sun and climate.

The **6 magnificent duplex on the 9th floor must be highlighted**, with a built surface area of 250m2, with 3 or 4 bedrooms, 2 bathrooms and a large terrace. They have a storeroom and 2 garage places.

The properties have been designed to respond to important matters such as comfort, exclusivity and brightness, taking care of every detail to give you large and flexible indoor and outdoor spaces to make your everyday life more comfortable.

OCTAVIA will have the most complete and exclusive services and common areas, a universe of possibilities connected to the world through different amenities.

Natural light, the star of the show.

The studied orientation allows maximum use of the natural light, while the large terraces offer spectacular views on the bay of Málaga, as well as being a fantastic sundeck. **The lights and the views are the focal points at OCTAVIA**, helping connect with the beauty of the surroundings.

Open spaces, large windows and a careful interior distribution make all the areas in the home bright spaces that provide extra comfort and well-being.

Proposed interior design of reference

“Open Concept”.

Obtaining **a functional space, with large, open rooms, and warm**, timeless decor were the main objectives of creating OCTAVIA.

Achieving visual continuity is fundamental to create a greater sensation of space. Projecting an atmosphere of perfect intimacy.

The kitchen as the connection.
Using an “Open Concept” a unique space is designed with the sitting room – dining room, gaining functionality, versatility and allowing the natural light to circulate among them.

Large, bright rooms to enjoy maximum comfort.

Top-quality materials.

At OCTAVIA you will be submerged in a world of sophistication in which the finest details have been taken care of. You will find unique spaces that offer you a perfect, intimate ambience for your family's enjoyment and well-being.

The elegance and simplicity of our natural finishes are combined to perfection **with the excellent quality of the materials**, thus achieving unique homes that stand out for their beauty and functionality. We also have brands of international relevance, such as Saloni, Roca, Cosentino, Vescom, Dekton and Grohe that transform each room into an authentic luxury.

Enjoy special moments.

OCTAVIA will have a versatile multi-purpose space to configure according to the tastes and hobbies of the community, having endless possibilities to turn it into:

Leisure area

Relax area

Projection area

Wine cellar

Quick and easy charging in your own home.

Property owners have vehicle and electrical bike charging points pre-installed in the parking space, to charge their vehicles overnight or at times of low energy demand.

Living in OCTAVIA means committing to a model of sustainable mobility and respect for the environment. You won't find a better way better way to take care of your health and enhance your well-being.

Pre-installation of vehicle charging points

Charging points for e-bikes and scooters

Vehicle wash area

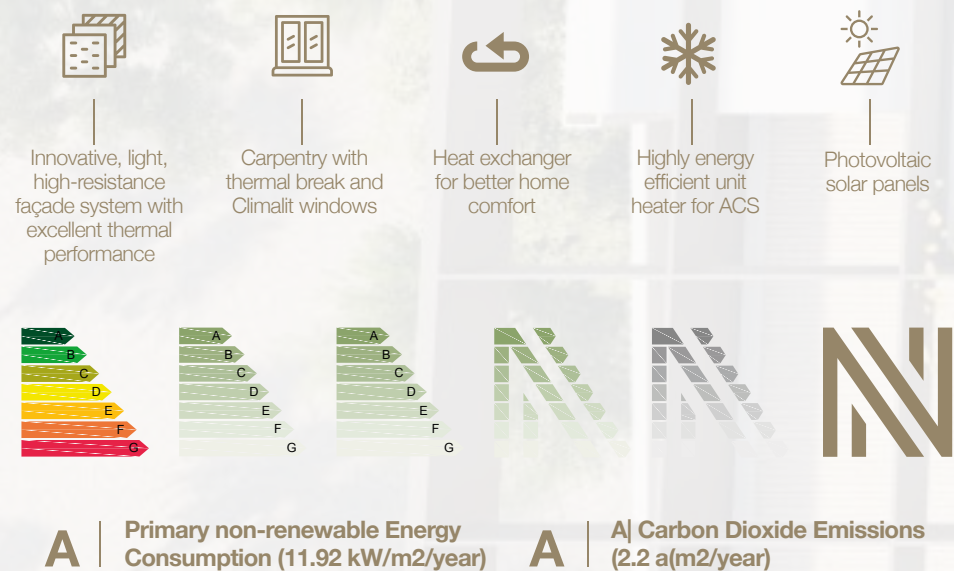

Bicycle and scooter repair workshop

Energy efficiency. “A” Energy Rating.

At Nuovit Homes we have a responsible view of architecture, investing in construction models and designs that respect the environment and are integrated in the surrounding ecosystem.

We work to the highest standards on matters such as environmental protection and intelligent energy consumption.
OCTAVIA has an A energy rating.

* Calculations according to the energy efficiency table compared against the average value of the B energy rating

Proposed interior design of reference

Sustainability and environment. BREEAM certificate.

For Nuovit Homes, the fight against climate change is a priority and for this reason **we are committed to the implementation of measures that reduce the environmental impact caused by our activity** and which will be reflected in the BREEAM (Building Research Establishment Environmental Assessment Methodology) certificate, given to the Octavia project.

The BREEAM certificate, developed by the BRE Global organisation of the United Kingdom, is the most technically advanced building evaluation and certification method and a world leader in sustainability.

The Sun. Endless energy.

We know sunlight is essential to create a more welcoming and comfortable homely ambience in climatic terms. The sun also increases the production of happy hormones such as endorphins and serotonin, which improves physical health and increases energy.

As well as these benefits, the amount of sunlight that reaches our house is closely related to its energy efficiency. Natural light allows us to reduce the consumption of energy in lighting and heating, maintaining a pleasant temperature.

At OCTAVIA, an exhaustive analysis has been carried out on the orientation and intensity of the sunlight at different times of the day and year. As a result, a structure has been created that makes the most of a renewable, sustainable and non-contaminating source of energy.

Solar panels

Significant reduction in consumption

Real commitment to the environment

LEGAL NOTICE:

These options may be replaced by Nuovit Homes for others of equivalent quality. Consult the legal text below:

Project at the pre-sales stage to identify potential purchasers. Building permit being processed. The plans of each of the properties and annexes are available to purchasers in the sales offices. This document, including the photographs, has been created from the Preliminary Plans, so it may undergo modifications due to technical demands, adjusting in any case to the Final Plans and the requirements of the municipal authorities. For the relevant purposes, the Developer expressly states that its actions, as well as the contracting of this development, will at all times meet the requirements established in the Building Standards Law 38/1999, of 5 November. Likewise, it also states that the advance payments for construction of the development plus the corresponding legal interest will be guaranteed by a financial entity pending designation from the date on which the corresponding building permit is obtained and the downpayments begin to be received, which (including the reservation amount) will be deposited in a special account in accordance with that provided in the cited law. Copy of the cited guarantee will be delivered to the purchasers when the private sale and purchase agreement is signed. The model of the cited agreement is available to purchasers to consult the general terms and conditions. The Statutes that govern the Owners Association will be approved at the end of the works. Determination of the participation in the common elements of the building will be done by taking into consideration the criteria set out in Article 5 of the Horizontal Property Law 49/1960 of 21 July.

The information included in this catalogue of building specifications is subject to possible modifications, Nuovit Homes reserving the right to change those required for legal, technical or commercial reasons as advised or ordered by the competent public bodies.

The specific make and model of each product are stated for guidance purposes, so the products mentioned may be replaced by others of equivalent quality if the aforementioned reasons concur. The images and infographics shown have been created in accordance with the information contained in the Preliminary Plans, with installations such as radiators, gratings, sockets, drainpipes, etc. For this reason, the images and infographics in this leaflet are merely for guidance and are not binding at a contractual level.

This document is merely for information purposes; it is subject to modifications due to urban development, administrative, technical or legal requirements arising from the technical management and the corresponding grant of the necessary licences and permits as well as for construction or design needs, without this impairing the described specifications overall. The reference images and infographics are for guidance purposes and are non-binding contractually. This dossier contains images that are virtual recreations of the project and have decorative elements, furniture and vegetation that are not part of the offer. The prices of the properties, if set out in this document, do not include the VAT corresponding to the purchase of the property, nor the costs arising from it.
